Paediatric first aid and resuscitation

Approximately 300 Australian children die each year due to accidental injuries. Many of those lives could have been saved if parents or caregivers knew simple first aid and resuscitation skills.

Emergcare will present this two hour course for parents and guardians of young children that has been developed in association with the Royal Children's Hospital Child Safety Centre and taught by ambulance paramedics. This course will cover:

- how to care for an unconscious child;
- febrile convulsions;
- child and infant resuscitation;
- calling an ambulance; and
- management of a choking child.

Understanding children's behaviour:
Survival tips for parents

Do you sometimes feel like you just don't know what to do next in your parenting? Do you wonder why your children behave the way they do and what to do about it?

Kathy Walker will present this session for parents and guardians of young children. This presentation will focus on the behaviour of children from birth to 10 years and it will provide an overview of the reasons why children behave the way they do. It will also give some practical strategies for parents to support their children and guide their behaviour in appropriate ways. Parents will be able to raise questions on specific issues at the presentation.
